

European Central Bank Monetary Intermediation Cost Historical Support for 100% Full Reserve Demand Deposit Banking

All of the persons listed supported a 100% reserve banking system and although many likely had different versions of the exact structure such a system might have they were all supportive of 100% reserve (time matched lending without money creation ability) banking. One version known as "The Chicago Plan" primarily by Henry Simons was supported by hundreds of economists in the 1930's and further developed by Irving Fisher.
